

TO ENGINEERS, ARCHITECTS, AND CON-  
TRACTORS.

**GREAVES'S LIAS CEMENT** and  
**GROUND BLUE LIAS LIMB**, at S. South Wharf,  
Paddington, London, and Works, Southam, Warwickshire.  
Agent for Liverpool, Mr. WYLLIE, 36, Gt. Water street; ditto  
for Manchester, Mr. J. THOMPSON, Back King-street;  
ditto for Chester, Mr. J. HARRISON, Lines Hall-street.

**ATKINSON'S CEMENT.**—The public is  
respectfully informed, that the price of this very ex-  
cellent Cement, which has now been in use for Architecture  
and Engineering works upwards of thirty years, is reduced to  
3s. 6d. per bushel, and may be had in any quantity at Wyatt,  
Parker, and Co.'s Wharf, Huddersfield-street, Surrey side of  
Blackfriars-bridge.

N.B.—This Cement being of a light colour, requires no arti-  
ficial colouring or painting, and may be used for stucco with  
three parts its own quantity of sand.

**MARTIN'S PATENT CEMENT.**

TO ARCHITECTS, BUILDERS, AND PAINTERS IN  
Fresco.

**STEVENS AND SON, PATENTEES** and  
**SOLE MANUFACTURERS**, beg respectfully to  
announce that this beautiful Cement has now arrived  
at a degree of excellence far surpassing their most sanguine  
expectations. For all internal work it possesses a great  
superiority over every article hitherto in use; it is now being  
used extensively by Government in the British Museum and  
other public buildings. **IT DOES NOT THROW OUT  
ANY SALT**, but presents a beautifully plain and perfect  
surface, which may be polished upon dry work within four  
days without peeling. It is equally applicable for walls or  
ceilings, for mouldings, architraves, skirting, or flooring; and is  
admitted to form the best ground for fresco painting, having  
been used for many of the prize frescoes lately exhibiting in  
Westminster Hall. It will bear an intense heat without  
cracking, and for hardness, durability, and economy, cannot  
be equalled.

106, DRURY-LANE, LONDON.

Agent for Liverpool and Manchester, Mr. R. Part, 11,  
Atherton's-buildings, Dale-street, Liverpool.

**KEENE'S PATENT MARBLE  
CEMENT.**—The Patentees of this composition beg  
to refer to the British Museum, the Royal Exchange, the new  
works at Bethlem Hospital, Green-drach Hospital, and the Co-  
liseum in the Regent's-park, as buildings finished or in pro-  
gress, in which Keene's Cement has been used as an internal  
stucco. Its superiority to common plastering consists in its  
extreme hardness, and the rapidity with which it dries, which  
qualifies it to receive paint or other finishing sooner than  
other water cements.

When employed for skirtings, architraves, and other  
mouldings, in place of wood, it checks dry-rot, is impervious  
to vermin, prevents the spread of fire, and is more eco-  
nomical in its application than the material for which it thus  
becomes the substitute.

Confirmation of these statements is to be found in the  
almost universal adoption of Keene's Cement for skirting  
and wall flooring in the new houses on the Hyde Park Estate,  
where its application is to be seen to the fullest advan-  
tage.

In Liverpool and Manchester, Keene's Cement has in  
several cases been used for the covering of the fire-proof  
warehouse floors, where its lightness and hardness give it the  
preference over tiles and flagstones, which are much heavier,  
and necessarily leave the floor intersected with numerous  
joints, whilst Keene's Cement is laid down in one unbroken  
surface.

The high polish and marble-like hardness of which this  
Cement is susceptible render it the most suitable material  
for the manufacture of scagliola.

Patentees, J. B. WHITE & SONS, Millbank-street,  
Westminster, Manufacturers of Roman and Portland  
Cement.

Depot in Liverpool, 36, Seel-street; James Woods, Agent.

TO ARCHITECTS, ENGINEERS, CONTRACTORS,  
BUILDERS, MASONS, AND PLASTERERS, MER-  
CHANTS, SHIPPERS, AND THE PUBLIC IN  
GENERAL.

**JOHNS AND CO.'S PATENT STUCCO  
CEMENT.**—The following are the positive advantages  
possessed by this invention over every Cement hitherto in-  
troduced.—It will effectually resist damp. It will never  
vegetate nor turn green, nor otherwise discolour. It will  
never crack, blister, nor peel off. It will form a complete  
stone casing to any building covered with it. It so closely  
resembles stone that it is impossible to detect it. It never  
requires either to be painted or coloured. It will keep fresh  
and good in the rain in any climate for any number of years.  
It is the only Cement that can be depended upon for export.  
It is the only Cement that can be used with confidence by the  
Non-ade. It may be used in the hottest or coldest climates  
at any season. It will adhere to any substance, even to  
Wood, Iron, or Glass. It will carry a larger Proportion of  
load than any other Cement. It matures by age, and be-  
comes perfect when other cements begin to perish. It may  
be worked through the Winter, as frost has no effect upon it.  
It may be used on the Inside Walls of new Houses, which  
may be papered over or painted directly. Roofs laid or  
pointed with this Cement will remain undamaged by the  
severest Storms. Any Plasterer may apply it, the Instruc-  
tions for use being very clear and distinct. The first cost of  
this material does not exceed that of the cheapest Cement  
now in use; but with all the above-named extraordinary and  
valuable advantages, nothing can approach it in point of  
cheapness.

Architects and Builders who have used this Cement have  
discovered that it requires only to be known, to be universally  
preferred.

Specimens may be seen, and a Prospectus fully describing  
the Cement and its mode of application, together with a  
volume of Testimonials from every part of the Kingdom, may  
be obtained on application to **MANN AND CO., SOLE  
AGENTS** for the Patentees, 5, Maiden-lane, Queen-street,  
Chancery, London: of whom also may be had,

**JOHNS AND CO.'S PATENT STUCCO COLOUR  
STUCCO PAINT**, expressly intended for Painting over es-  
timate Walls of Houses that have been covered with Roman  
or other cements, and which have become dirty and discol-  
oured. It is in every way better suited for this purpose than  
White Lead Paint, which will frequently come off in flakes,  
being in direct chemical opposition with cements; whereas  
**MANN, JOHNS AND CO.'S PATENT PAINT** having an  
affinity for Stucco, binds itself with it, stopping the surface,  
rendering the wall proof against weather, and in the  
British producing a pure stone-like effect, producible by no  
other paint whatever. It is cheap in its application, and  
may be used by any Painter, in any climate, even in the most  
exposed Marine situations.

turning back the door in front of it behind the ashes pit door. In the construction of this cooking apparatus, every exertion  
has been made to combine the advantages of those materials as now used, in order to render it a  
useful, a durable, and elegant piece of furniture. It is simple, requiring the least possible amount of skill in its manage-  
ment; it is economic, doing a great quantity of work with a little fuel; it is efficient, having every requisite, and performing  
its operations with the utmost expedition; it is cleanly, bearing its own smoke, and making no dust; it is equally applicable  
to small as to large establishments—to the cottage as to the palace; and may be seen in operation, by applying at the  
FINSHURY PATENT TECHNICAL CITY ROAD, near Bunhill Fields Rural-ground, and at Mr. Lawton's, 6, Sheepen-
